 LIGHT ARMORED VEHICLES
 PERSONNEL

CiRiT

CiRiT, 2.75" Laser Guided Missile, is a field proven, highly accurate and cost effective solution against light armored/ unarmored stationary and moving targets. CiRiT is a Next Generation AUR missile, not a guidance kit, designed to fill the gap between 2.75" unguided rockets and guided anti-tank missiles. CiRiT has been integrated to various platforms such as helicopters, fixed-wing aircrafts, unmanned aerial & naval vehicles, land platforms.
