

## **TECHNICAL SPECIFICATIONS**

RANGE

30+ KM

LENGTH

1.4 M

WEIGHT

95 KG

DIAMETER

230 MM

GUIDANCE

LASER SEEKER

WARHEAD

BLAST FRAGMENTATION

THERMOBARIC

PLATFORMS UAVs

PERSONNEL

**TARGET TYPE** 

SOFT TARGETS IN CONFINED AREAS

RADAR ANTENNA ETC. GROUND

TARGETS

ARMORED VEHICLES

The MAM-T smart munition is a derivative of air-to-ground (against sea or land targets) smart munitions with high destructive power and has been developed for the critical missions of unmanned aerial vehicles (UAVs) and light attack aircraft. MAM-T can be used with alternative warheads against fixed and moving targets and has high accuracy and effectiveness.

In line with the changing operational conditions, MAM-T munition has the option of GPS configuration with proximity sensor. In this way, activation can be carried out at the desired height, as well as the ability to fire at the desired coordinates without laser designation.
